# Centre Display Module

WHEN IT DOESN'T WORK STRAIGHT AWAY

BGT4X4

The BGT4X4 Centre Display module is compatible with Pajero NS NT NW NX 2006-2021 models. Around the globe, not all Pajeros come with the same chip.
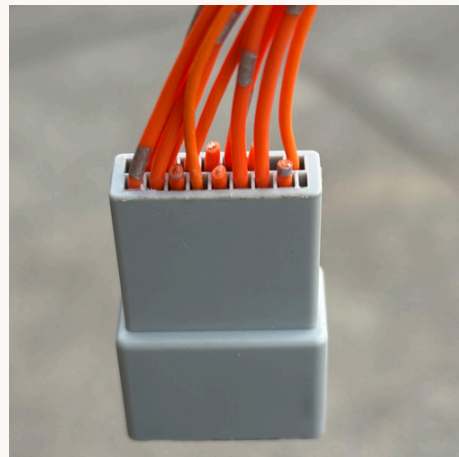

Now, what this means is that for some, this module will plug in and work straight away (try it this way yourself first). For others, a couple of easy steps need to be followed to get your unit working.

Watch our instructional video by clicking **here**.

The video shows where wires need to be cut on your module. Here they are again if you need a reminder:

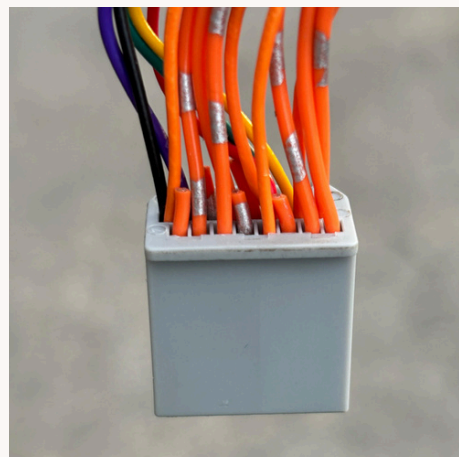

Start in this position and cut wires 2 and 4.

Turn it around and cut wires 3, 5, and 8.

Turn it upside down and start here. Cut orange wires 4 and 6.

Turn it around and cut wires 1, 4, and 6.

WHEN IT DOESN'T WORK STRAIGHT AWAY

BGT4X4

Once all wires have been cut, proceed with the following steps.

1. Plug module back in.
2. Hold **ADJ** button for approx. 10 seconds.
3. Whilst holding it, after the 10 seconds have passed, turn your car on. The service menu will appear.
4. Press **ADJ**.
5. It will now show "body type long". Now click **INFO**.
6. Now it will show "function type reset 1". Select that.
7. It will now say "reset ok?". Select that.
8. Once all this has been done, turn the car off, wait a few seconds and turn it back on.
9. Press **INFO** until the correct screen is shown.
